1. Introduction

This supplementary material presents examples of the data sets, screen shots of the the user study as well as additional analysis results.

[Figure 1](#) shows boxplots of the completion time and confidence of the participants. More details with respect to percentage of removed data can be seen in [Figure 2](#), [Figure 3](#), and [Figure 4](#).

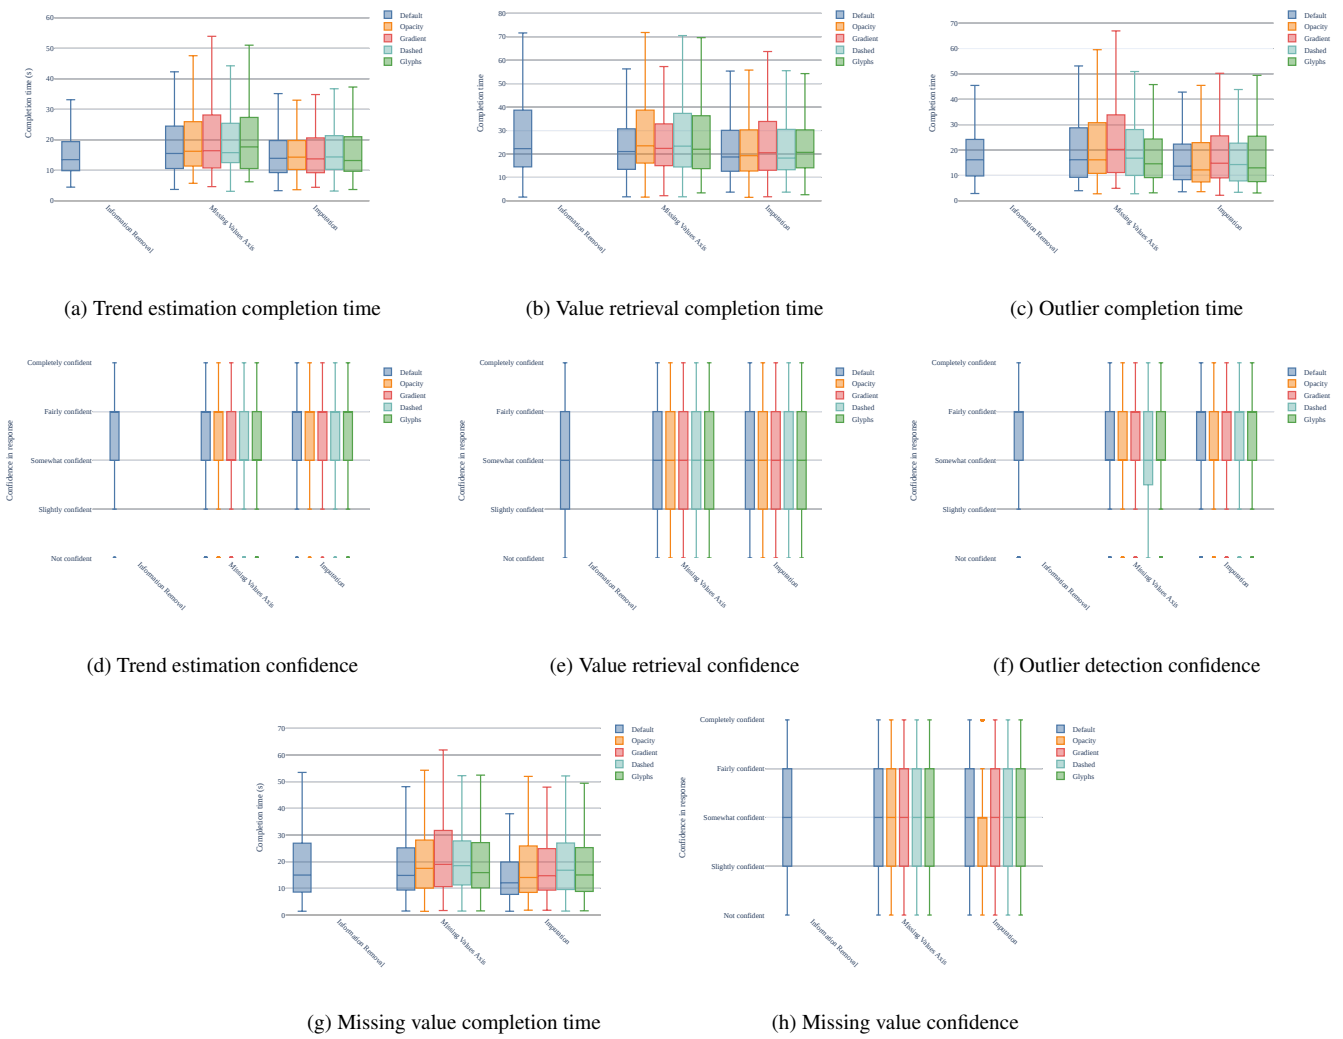

Figure 1: Completion time and confidence in the answer for each task, concept, and variation.

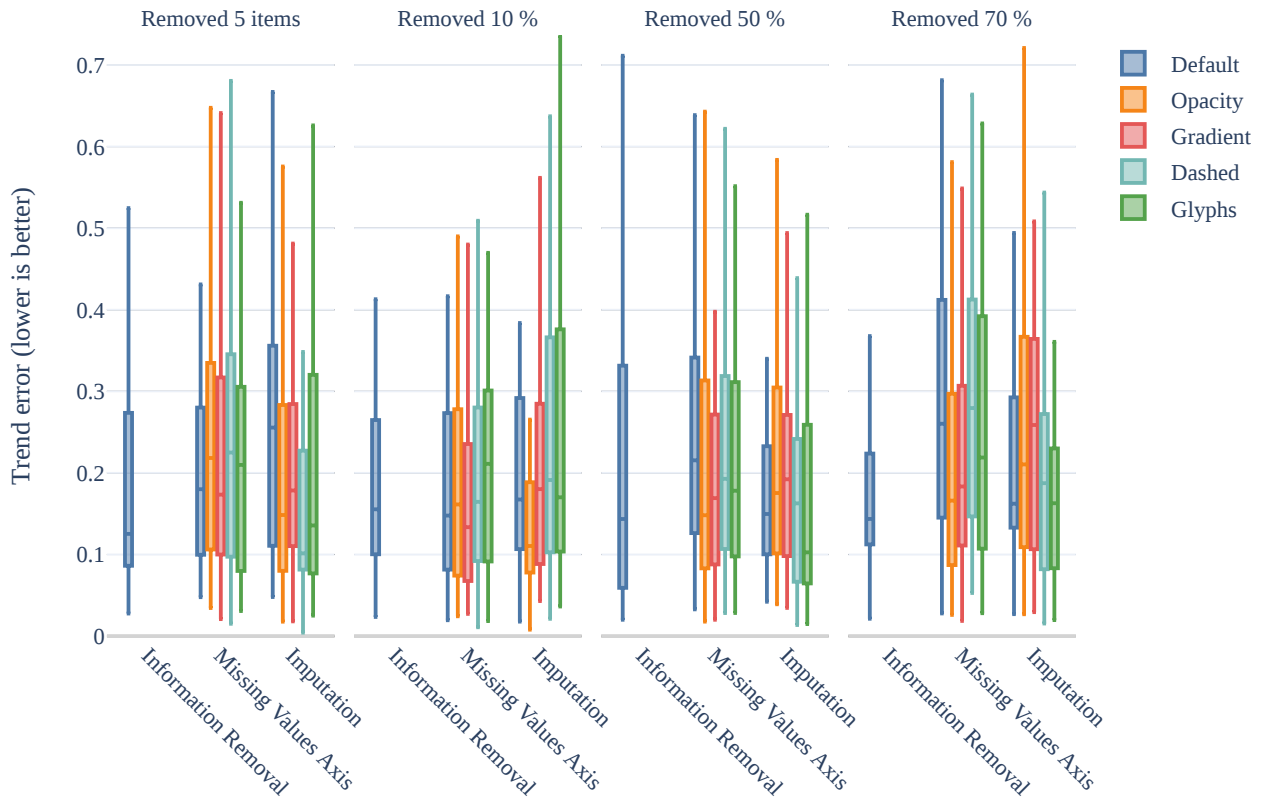

Figure 2: Trend estimation error for increasing numbers of removed values.

Figure 3: Value retrieval accuracy for increasing numbers of removed values.

Figure 4: Outlier detection performance for increasing numbers of removed values.
