Preface

Eurographics has a long and proud tradition in computer graphics education, going back to the beginnings of the Association. This education work has been carried out through a number of workshops over the years. Some of these workshops have been held in conjunction with the annual Eurographics conference, and several conferences have had papers or panels that deal with education, but 2003 marks the first time that the annual conference has included a formal programme dealing with education. We appreciate the vision of the conference organisers and Eurographics leadership in including this programme in 2003.

We are pleased to present the following set of papers on computer graphics education to the Eurographics community. They include papers on

- An interactive tutorial on computer graphics algorithms.
- A virtual laboratory for group work in computer graphics education, with an eye on distance learning.
- A discussion of 3D virtual environments for constructivist teaching and learning.
- Issues in designing interaction for Web-based teaching.
- A presentation on a Eurographics/SIGGRAPH repository for refereed content for computer graphics education.

We believe that you will find that these papers can give you some interesting ideas on your own teaching. We hope they will lead to more discussion and publication on teaching within Eurographics the broader computer graphics community.

Eurographics 2003 Education Programme Chairs

Table of Contents

| | |
|---|----|
| <i>Interactive Learning of Computer Graphics Algorithms</i> | 1 |
| Zhigen g Pan, Hung Pak Lun, Rong Gao | |
| <i>Learning by doing: A Case for Constructivist 3D Virtual Learning Environment</i> | 7 |
| Weihua Hu, Jiejie Zhu, Zhigen g Pan, Yanfeng Li, Cunhui Ju | |
| <i>A Virtual Laboratory for Computer Graphics Education</i> | 17 |
| L. W. Pettersson, N. Jensen, S. Seipel | |
| <i>Drag & Drop Scripting: How To Do Hypermedia Right</i> | 23 |
| F. Hanisch, W. Straßer | |
| <i>A Refereed Server for Educational CG Content</i> | 29 |
| Frederico C. Figueiredo, Dena E Eber, Joaquim A. Jorge | |
