Preface

The Eurographics Association organizes a biannual competition to acknowledge the contribution that computer graphics is playing in the medical field, and to encourage further development. In 2010 the Eurographics Medical Prize was renamed to Dirk Bartz for Visual Computing in Medicine to honor Dirk Bartz who passed away far too early in March the same year. Dirk was a highly recognized and enthusiastic scientist, teacher and promoter of Visual Computing in Medicine, an active member of the Eurographics Association, and Chair of the EG Medical Prizes 2007 and 2009.

This publication presents the work of the winners of the third Dirk Bartz Prize for Visual Computing in Medicine 2015, which is the seventh Eurographics Medical Prize competition since 2003. The papers are archived in the Eurographics Digital Library and are considered peer-reviewed publications. The three winning contributions were selected from high-quality submissions. The winners will be announced and will receive the prize certificates in the EG 2015 award ceremony on Monday, May 4, 2015, and they will present their work during the Dirk Bartz Prize session on Wednesday, May 6, 2015. We would like to thank all participating teams for their high-level contributions, the Scientific Committee, Stefanie Behnke, the EG Support Team, and the local organizing staff at University of Zürich and ETH Zürich. We hope that you will enjoy this year's Medical Prize program and we look forward to seeing you all in Zürich.

Hans-Christian Hege and Timo Ropinski
