

Fig. 9(a): Test level 192: (Top) LHS is 192 and RHS is 90% resolution interpolated. (Bottom) LHS is 75% interpolated and RHS is 192. It can be seen that the quality degradation on the bottom left cube is obvious.

Fig. 9(b): Test level 160: LHS is 160 and RHS is 75% resolution interpolated. It can be seen that the baboon and kimono texture quality on both cubes are similar.

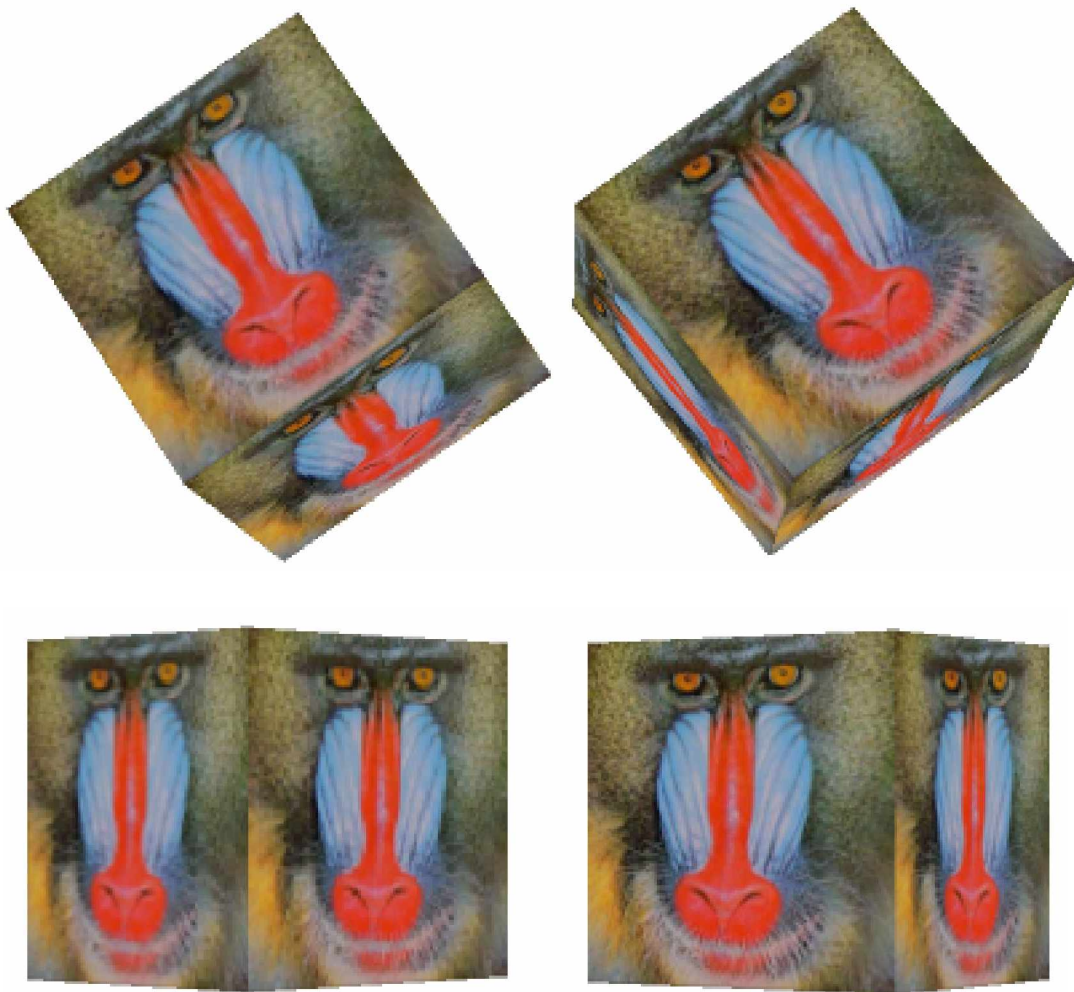

Fig. 9(c): Test level 128: (Top) LHS is 90% resolution interpolated and RHS is 128. (Bottom) LHS is 75% interpolated and RHS is 128. It can be seen that the quality degradation on the bottom left cube is obvious.
