# {3} Visual Exploration, Assessment, and Comparison of Multiple CVs

Velitchko Filipov, Paolo Federico, Silvia Miksch

Problem

› A lot of CVs to **compare simultaneously**
› **Multivariate** data
› **Side-by-side** comparison most common
› **Doesn't scale** well

Concept

› Utilize **information visualization** techniques for multiple CVs
› Present information **quickly** and **clearly**
› **Eye catching** and **visually** pleasing design

Solution

› Prototype development using **modern web technologies**
› Linked views to **interactively explore** and **compare** CVs
› **Filter and compare** events with similar characteristics
› Details **on demand**

Conclusion

› Improves **cognition** by utilizing visualization
› Improves **usability** by utilizing interactivity
› Enhances ability to see **patterns** and **trends**

_Future_work_

› **Scoring system** to rank CVs
› **Network** visualization
› **Automatic** assessment

Prototype
