

# **EG PGV 2015**

## **15th Eurographics Symposium on Parallel Graphics and Visualization**

**Cagliari, Sardinia, Italy  
May 25 – 26, 2015**

### **Symposium Chair**

Fabio Marton, CRS4, Italy

### **Program Co-Chairs**

Carsten Dachsbacher, Karlsruhe Institute of Technology, Germany  
Paul Navrátil, Texas Advanced Computing Center, Texas

### **Proceedings Production Editor**

Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)

Sponsored by EUROGRAPHICS Association

Dieter W. Fellner, Werner Hansmann, Werner Purgathofer, François Sillion  
Series Editors

## Table of Contents

Table of Contents .....	iii
Keynote .....	v
International Program Committee .....	vi
Additional Reviewers .....	vi
Author Index .....	vii

### Efficient Representations

Large-Scale Parallel Visualization of Particle-Based Simulations using Point Sprites and Level-Of-Detail .....	1
<i>Silvio Rizzi, Mark Hereld, Joseph Insley, Michael E. Papka, Thomas Uram, and Venkatram Vishwanath</i>	
Memory-Efficient On-The-Fly Voxelization of Particle Data .....	11
<i>Tobias Zirr and Carsten Dachsbacher</i>	
Visualization of 2DWave Propagation by Huygens' Principle .....	19
<i>Stefan Heßel, Oliver Fernandes, Sebastian Boblest, Philipp Offenhäuser, Malte Hoffmann, Andrea Beck, Thomas Ertl, Colin Glass, Claus-Dieter Munz, and Filip Sadlo</i>	
VISUALIZATION SHOWCASE	
Visualization Showcase: General-Relativistic Black Hole Visualization .....	29
<i>Thomas Müller, Sebastian Boblest, and Daniel Weiskopf</i>	

### Parallel Rendering

SIMD Parallel Ray Tracing of Homogeneous Polyhedral Grids .....	33
<i>Brad Rathke, Ingo Wald, Kenneth Chiu, and Carson Brownlee</i>	
Packet-Oriented Streamline Tracing on Modern SIMD Architectures .....	43
<i>Bernd Hentschel, Jens Henrik Göbbert, Michael Klemm, Paul Springer, Andrea Schnorr, and Torsten W. Kuhlen</i>	
Volume Rendering Via Data-Parallel Primitives .....	53
<i>Matthew Larsen, Stephanie Labasan, Paul Navrátil, Jeremy Meredith, and Hank Childs</i>	
VISUALIZATION SHOWCASE	
Visualization of High-Resolution Weather Model Data .....	63
<i>Si Liu, Greg Foss, Greg Abram, and Anne Bowen</i>	

## Table of Contents

### Improved Algorithms

TOD-Tree: Task-Overlapped Direct send Tree Image Compositing for Hybrid MPI Parallelism . . . . .	67
<i>A. V. Pascal Grosset, Manasa Prasad, Cameron Christensen, Aaron Knoll, and Charles Hansen</i>	
Contour Tree Depth Images For Large Data Visualization . . . . .	77
<i>Tim Biedert and Christoph Garth</i>	
Out-of-Core Framework for QEM-based Mesh Simplification . . . . .	87
<i>Hiromu Ozaki, Fumihito Kyota, and Takashi Kanai</i>	
VISUALIZATION SHOWCASE	
Visualizing Groundwater Flow Through Karst Limestone . . . . .	97
<i>Carson Brownlee, Aaron Knoll, Paul Navrátil, Kevin J. Cunningham, Michael C. Sukop, and Sadé Garcia</i>	

## Keynote

### Massive Parallelism in Intel's Graphics Processors

*Tomas Akenine Möller*

#### **Abstract**

The performance improvement in graphics processors over the past decade has been tremendous, and it is intriguing to see that the graphics part of the chip die now is larger than for the CPU part. In this presentation, I will explain how this kind of parallelism can be achieved by describing the graphics processor in Intel's Broadwell architecture. In addition, I will show how a ray tracer can be mapped, using OpenCL, to such an architecture with shared memory, and will demonstrate interactive performance.

#### **Short Biography**

Tomas Akenine Möller is a professor in computer science with specialization in computer graphics and image processing at the Department of Computer Science, Lund University, Sweden. Over the past years, he has built the computer graphics group, LUGG (Lund University Graphics Group), there. He received an MSc in Computer Science and Engineering from Lund in 1995, and went on to Chalmers University of Technology, where he got his PhD in computer graphics in 1998. During 2000, he was a post doc at UC Berkeley, and also spent some time at UC San Diego (2004/2005) as a visiting researcher. Tomas has been co-papers-chairing Graphics Hardware (2004), Eurographics Symposium on Rendering (2006), and Eurographics 2010. He currently works part time at Intel in Lund as a tech lead with a fantastic team of graphics researchers. In December 2008, Intel acquired Swiftfoot Graphics, which is a company he co-founded with three of his PhD students. Tomas is also a co-author of the book Real-Time Rendering. He has written 80+ papers, and still counting.

## **International Program Committee**

Marco Ament, Karlsruhe Institute of Technology  
Harsh Bhatia, Lawrence Livermore National Laboratory  
Hank Childs, University of Oregon  
Kurt Debattista, University of Warwick  
Stefan Eilemann, École Polytechnique Fédérale de Lausanne  
Berk Geveci, Kitware Inc.  
Michael Guthe, University of Bayreuth  
Jens Krüger, University of Duisburg-Essen  
Torsten Kuhlen, RWTH Aachen University  
Patrick McCormick, Los Alamos National Laboratory  
Kenneth Moreland, Sandia National Laboratories  
Tom Peterka, Argonne National Laboratory  
Bruno Raffin, INRIA Grenoble  
Filip Sadlo, University of Stuttgart  
Daniel Weiskopf, University of Stuttgart  
Michael Wimmer, Technische Universität Wien

## **Additional Reviewers**

Marwan Abdellah, École Polytechnique Fédérale de Lausanne  
Greg Abram, Texas Advanced Computing Center  
João Barbosa, Texas Advanced Computing Center  
Nicolas Bonneel, Le Centre National de la Recherche Scientifique  
Carson Brownlee, Texas Advanced Computing Center  
Alessandro Febretti, Electronic Visualization Laboratory  
Christoph Garth, Kaiserslautern University of Technology  
Toshiya Hachisuka, University of Tokyo  
Johannes Hanika, Karlsruher Institut für Technologie  
Carlo Harvey, University of Warwick  
Aaron Knoll, SCI Institute  
Matthew Larsen, University of Oregon  
Jeremy Meredith, Oak Ridge National Laboratory  
Gregor Mückl, Karlsruher Institut für Technologie  
Paul Rosen, University of Utah  
Christian Schulz, Max-Planck-Institut für Informatik
